Agentic Tools That Amplify Humans: MCP, CLI & the Future of Teacher Co-Pilots

DR. KRIS ALEXANDER · TORONTO METROPOLITAN UNIVERSITY

Walk in and win
Set up polished scenes and workflows once, then reuse them every class.

Mouth to market
Have students build tangible projects with a real-world purpose.

Private by design
Use offline local models and MCP for sensitive student data.

THE TOOLKIT · TAP ANY CARD

OBS Studio
obsproject.com
Scenes hold layouts; sources are the camera, mic, media and windows layered inside them.

OBS Virtual Camera
obsproject.com/kb
Send your OBS output into Teams or Zoom as a webcam.

VoiceMeeter Banana
vb-audio.com
Virtual audio mixer: route music, mics and sound effects into one bus.

Coconote
coconote.app
Record a lecture and get a summary PDF, full transcript, quizzes and flashcards.

Google NotebookLM
notebooklm.google.com
Add transcripts, PDFs and websites, then make a podcast, mind map or report.

Grok Bot · agents
grok.com
Task-specific bots that make files, run checks and triage email, with a manager bot.

Model Context Protocol
modelcontextprotocol.io
Connects AI models to local apps like Mail and Finder so agents can act on them.

ArtCraft's GridCraft
getartcraft.com/apps
ArtCraft's open-source art and craft app.

LM Studio
lmstudio.ai
Model manager that recommends local models based on your GPU.

Ollama
ollama.com
Run open models locally on your desktop, including on an offline machine.

Lemonade Server
lemonade-server.ai
Local inference server for AMD GPU setups.

More from ArtCraft's open-source suite: GridCraft, PDFCraft, SoundCraft and VectorCraft, built to connect with MCP.

Try it: build three OBS scenes, test Coconote on one lecture, explore a local model offline.

Agentic tools that amplify humans.
